

Celebrating 40 Years of Mutual Success

Celebrating our 40th year of "Best in Class Service", Polymer Resources continues to be the leader in Classic® engineering thermoplastic compounds. Founded on the principles that still drive the company today, Polymer's proven methods allow the flexibility of a small resin supplier:

- **Shortest industry lead times**- In stock to 2-3 weeks
- **Custom colors**- Precision in-house color matching
- **Custom tailored formulations**-A material that meets your performance requirements
- **On and off site technical services**- Full access to our quality and technology and product development departments

Combined with the services of a larger material supplier:

- **Standard products**- Standard offsets in black, natural, and grey
- **Small to large release quantities**
- **Competitive economics**- Function of global sourcing and financial strength

The sum of these competitive advantages allows Polymer to provide the flexibility and capability required in today's dynamic marketplace without sacrificing our value proposition:

- **Top customer service**- Ensures every relationship is cultivated with the utmost resources
- **Leveraging our UL certifications**- Enables streamlined compliance giving our customers a competitive advantage
- **Financial independence and dual production facilities**- Facilitates the flexibility and capability to control production, resulting in short lead times, flexible release quantities, and 100% quality assurance
- **Experienced and well trained team**- in-depth knowledge to support any end-user application
- **ISO 9001 registered company**

Therefore, forty years of experience is included in every pellet manufactured, shipped, and processed. Our goals are aligned with yours, and as you grow, we grow. Our responsibility as a resin supplier is to not only provide the initial product, but to also back your continued success. We thank you for your business, and look forward to many more years of *mutual success*. Here's to forty more!

Polymer Resources, LTD.

"The Leader In Classic® Engineering Plastic Compounds"

Independently held since 1974, Polymer Resources has been a premier supplier of UL and non UL thermoplastic compounds to industries across the globe. Having two operations facilities in Farmington, CT and Rochester, NY, Polymer is uniquely equipped to supply a diversified range of markets.
