## Color Services

Color helps you meet customer requirements for brand integrity, value enhancement, consumer appeal – even regulatory compliance – in end products. The challenges of color start with identifying the right colorants to meet your specifications – such as weatherability, resistance to ultraviolet (UV) light, and compliance with US Food and Drug Administration or UL requirements. Other considerations are accurately matching an existing color and ensuring consistency across resin lots.

Polymer Resources offers color services that are tailored to the specific needs of our customers and feature technical precision, fast turnarounds and consistently high quality. We recently expanded our staff of color specialists and enhanced our express service.

- **Precision Color Matching:** Polymer Resources offers expert, fast color matching services to meet your requirements. Our color lab specialists bring together 75 years of combined experience and in-depth knowledge of all available colorants. We can match colors using leading systems including Pantone, Europe's RAL and the U.S. government's AMS-STD-595. We use current data color spectrophotometry technology with integrated process control to formulate, test and deliver precisely color-matched compounds with lot-to-lot consistency.
- **Express Service:** With our new expedited service, you can get to market faster. Color matching begins as soon as we receive the part, pellets, or Pantone color to match and the application requirements. Sample color chips are always provided quickly for your review and approval; and our new color matching Express Service is available when your deadlines are measured in days and not weeks.

**Polymer Resources' full portfolio of base resins and blends can be custom-colored.**

- Polycarbonate (PC)
- Polyphenylene Ether (PPE)
- Polybutylene Terephthalate (PBT)
- Acrylonitrile Butadiene Styrene (ABS)
- Acrylonitrile Styrene Acrylate (ASA)
- Polyetherimide (PEI)
- Nylon 6/6
- Nylon 6
- Polycarbonate Blends: PC/ABS, PC/PBT, PC/ASA
